### REMINDER:

Granger will be picking up live Christmas Trees the first two weeks after the New Year.

The decorations in the downtown planters were provided by the Webberville Garden Club. The Village would like to thank the Garden Club for all of their efforts to help beautify our community.

### Spotlight:

We would like to thank the DPW for their hard work especially during the holiday season. They were out plowing at all hours trying to keep up with the snow storm we received. Even on Christmas, away from their families, they were out here trying to get what they could cleared up.

With colder temperatures comes the risk of frozen pipes. An eighth-inch crack in a pipe can leak up to 2580 gallons of water a day. Both plastic and copper pipes may burst, causing property damage. Here are a few tips that may help to prevent your pipes from freezing:

- Insulate pipes in crawl spaces and attics.
- Use heat tape or thermostatically-controlled heat cables to wrap pipes.
- Seal leaks that allow cold air inside.
- Disconnect garden hoses and if practical, use an indoor valve to shut off and drain water leading to outside faucets.
- Open cabinets to allow heat to reach uninsulated pipes under sinks and appliances near exterior walls.
